

Introducing

THE FOAM CUBE II

Your **complete** mobile spray foam solution

Overview

Introducing **The Foam Cube II**. This revolutionary spray foam advancement creates an easier way to expand or enter the spray foam business using an existing truck or trailer. The Foam Cube II is ideal for use on **hard to access jobs** such as high rises and large buildings where the equipment needs to be brought inside. It's the **perfect auxiliary rig!** Its compact design makes a great **backup rig** if your primary equipment goes down or you just need a second rig on the job.

Features

- All aluminum light-weight custom fabricated shell built around the Reactor
- Easy access compartments for transfer pumps, Reactor and electrical
- Hose rack compartment
- Shore power cable holder
